

TECHNICAL DATASHEET

Introduction: **FireHalt Brushseal** is a high temperature textile penetration management seal designed to be used exclusively with the full range of Firehalt barrier systems.

FireHalt Brushseal, when correctly installed, will maintain the fire resistant of the chosen Firehalt barrier for up to 120mins .

Firehalt Brushseal is a “one size fits all” tape wrapping product that will suit most sizes and shapes of service penetrations with no wastage.

Physical Properties:

Description:	Lightweight / Health Safe / User friendly / Flexible / Durable / Easy to Shape, Fit and Cut
Colour:	White
Proprietary construction:	Non-woven textile / HT glassfibre.
Thickness:	4 - 5 mm
Weight:	325g/m
Fibre Diameter:	> 6 micron, (classified non-respirable)

Certification Body: **IFC** Certification Ref. # **Pending**

Test and Assessment Authority: Exova Warringtonfire Test Report Reference : **WF 175941**

Test Specification: **BS 476: parts 20/22** **Up to 120 minutes Fire Resistance**
[when combined with a Firehalt barrier system]

Packing Specification & Product Dims:

Roll Width:	145mm
Roll Length:	3m
Quantity in box:	4 rolls / 12 lm
Box Weight	4kgs
